Cirencester Tennis Club Facilities Report 2016

I'm pleased to say that currently everything is in order.

The back courts have recently been painted and apart from cleaning should be good for the next few years. The front courts have been cleaned so should be in good shape for the winter.

The newly upgraded net measuring sticks now provide highly accurate net heights while the new leaf clearing system of three new brooms is remarkably effective at removing leaves. A program of user training will be available to anyone who has stick holding issues.

The track has had it's 6 monthly fix and Hornbeam avenue is really starting to grow.

Many thanks to everyone who has supported the clubhouse cleaning. At the time of writing we're into the John's and a new list will be published around Christmas. If ever things get a bit untidy it's really appreciated when folks step in and help out on an ad hoc basis.

Many thanks,

George Brooks

President of the Soggy Ball Warmers Workers Union (section 2a.)
