## Cirencester Tennis Club Facilities Report 2017

I'll keep this brief as next years report might be a little longer!

The back courts have recently been sprayed with anti algae and are in good shape. With the help of the cricket club the track is ok but is certainly getting harder to keep in good order.

Much appreciation to everyone who's done their bit on the cleaning rota. It really helps when everyone does their bit to keep things tidy.

The new tubs by the entrance have done well over the summer as have our lovely flowers in front of the clubhouse. The new path to the back courts isn't quite right and the intention is to widen it and finish it with a non crunchy surface.

So far the new Defibrillator has been a waste of money - thank goodness for that!

By the time we meet for the AGM the new clay surface should be in place, exciting times!

Many thanks to everyone who has helped to keep the place in good order.
