CTC Facilities Report 2022

Courts

The big project for this year was obviously the back courts which although were delayed are now in full use. There's currently too much sand on them but this will gradually reduce as they are played on more - so get playing! The front courts are also due a top up but there's a delay in supply.

The new gates are to improve security and allow access for maintenance equipment.

Track

The new electric gate mostly works and everyone appears to be able to remember the code so well done!

Improvements have been made to the college section of the track which makes passing slightly easier. As always please report access issues to myself.

Neatly trimmed

Again Rachel and Judith continue to look after our potted plants so a big thank you to them.

Clubhouse

Needs an exterior repaint which I'll ask for help with in the Spring.

As always thanks to everyone for regularly sweeping the courts and generally helping to keep the place tidy, it really does help.

George Brooks

Well Sanded Facilities.
