CTC Facilities Report 2024

Clubhouse

My year has been dominated helping with the planning of the new clubhouse - which is increasingly looking like it might just happen! While there's a small team of people putting it all together it will only be possible with the support of the whole club. Thank you to everyone who's contributed so far.

Helpers

A simple change this year is forming a little what's app group of volunteers which has been incredibly successful. From filling potholes to mowing the grass it's suddenly a whole lot easier so a big thanks to everyone in the group along with Judith and Rachel looking after the plants.

Courts

I now have my very own tractor which means I can give the courts a through brushing every 6- 8 weeks. It's really hard work driving around, looking important and trying to keep the satisfied smile to a minimum!

As always thanks to everyone for regularly sweeping the courts and generally helping to keep the place tidy which is the real key to the place looking so good.

Weeds

I'm trying not to use weedkiller around the club so while there are more weeds around they will still be kept to a minimum.

Track

Well, we do our best.
