

Summer 2025 and Winter 2024 League Report

As always, thank you to all captains of each team. Without you, it would be very challenging to schedule and organise every team.

Summer 2025

A team

About eight matches in, we were leading the Premier Division, led by Ben, who finished second in the individual standings. Special mentions also go to Finlay and Miles, who both put up some impressive numbers on the stats sheet.

Ultimately, the two big guns in the league overtook us, but it was still a fantastic result — and we're aiming to go even further next season!

B team

The B team, led by Paul Harris in Division 1, had a thrilling finish to the season. With just a few matches remaining, relegation looked likely — but a huge 4–0 win against David Lloyd B put them right back in contention. A tense final match then secured promotion on set difference!

C Team

The C team, captained by Jon Lee, couldn't quite maintain last season's momentum. They finished 7th despite winning 40.5% of their matches — another example of how fine margins can make a big difference!

D Team

The D team found themselves up against it this season after narrowly avoiding demotion last year — the league committee kept them up, making for a tougher campaign than usual. Facing strong opposition most weeks, wins were hard to come by, and they ultimately finished 7th.

E Team

The E team struggled this season, with availability issues often making things even harder against strong opposition. Wins were scarce, and consistency proved difficult, but those who played did so in good spirits and kept the season going despite the challenges.

Winter 2024

The A team finished third in division 1 after being in contention for promotion until the final few games.

The B team finished in 6th, having been on the tougher side of division 1 among many A teams.

Congratulations to the C team on coming 2nd in division 3 and promoting to division 2!

The D team finished in 5th on the harder side of the 4th Division. A good effort winning 12 sets and hanging in.
